Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 May 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 5,086,635. Creaser et al show a work holder having a cylindrical shape curvature. The instant claimed intended use, as a laser irradiation stage, does not impart patentability to an apparatus claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 6,743,601 to Bonner et al. Bonner et al disclose a laser apparatus comprising means for expanding a laser beam and means for condensing a laser beam and means for moving a work holder. Bonner et al describe (Brief Summary BSTX 12) the well known use of a curved work holding surface. The use of a curved work holding surface in the apparatus disclosed by Bonner et al would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because laser

apparatus are well known and because a wide variety of work holders are well known for use with laser apparatus depending on the work which is intended to be irradiated with the laser. Cylindrical lens elements are well known in the laser art. Excimer, YAG, YVO4, YLF, YAlO3, and glass lasers are well known in arts such as laser annealing.

Double Patenting

Claims 1-15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 4, 8, 12, 15, and 17 of U.S. Patent No. 6,707,614. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claim descriptions do not add any elements which significantly change the instant claimed apparatus from the previously claimed invention.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art pertains to laser apparatus and to work holder apparatus.
